

8/16/2022

Gerald Dolphin MLAA board member at large

I have been on the lake since 1994.

I was involved with the initial committee for Eurasian Milfoil treatments.

I have been involved in buoy installation and removal for many years since moving here. My wife and I along with others have done buoy installation and removal for the last 10 years.

I have been trying to keep the goose population down. I have applied for a goose depredation permit for the last 2 years. I hope to be more successful in 2023.

My goal is to keep Moose Lake a safe, clean place for all to enjoy.
